🖄 Responsive to communication(s) filed on <u>Mar 6, 2000</u>	
☐ This action is FINAL .	
☐ Since this application is in condition for allowance except for formal matters, prosec in accordance with the practice under Ex parte Quay/1935 C.D. 11; 453 O.G. 213.	ution as to the merits is closed
A shortened statutory period for response to this action is set to expire month longer, from the mailing date of this communication. Failure to respond within the period for application to become abandoned. (35 U.S.C. § 133). Extensions of time may be obtained 37 CFR 1.136(a).	or response will cause the
Disposition of Claim	
	is/are pending in the applicat
Of the above, claim(s)	_ is/are withdrawn from consideration
Claim(s)	is/are allowed.
☐ Claim(s)	is/are rejected.
☐ Claim(s)	is/are objected to.
	t to restriction or election requirement.
Application Papers	
☐ See the attached Notice of Draftsperson's Patent Drawing Review, PTO-948.	
☐ The drawing(s) filed on is/are objected to by the Examiner.	
☐ The proposed drawing correction, filed on is ☐ approved	_disapproved.
☐ The specification is objected to by the Examiner.	
☐ The oath or declaration is objected to by the Examiner.	
Priority under 35 U.S.C. § 119	
☐ Acknowledgement is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d	l).
☐ All ☐Some* None of the CERTIFIED copies of the priority documents have	e been
received.	
received in Application No. (Series Code/Serial Number)	
received in this national stage application from the International Bureau (PCT	Rule 17.2(a)).
*Certified copies not received: Acknowledgement is made of a claim for domestic priority under 35 U.S.C. § 119(e).	
Attachment(s)	
☐ Notice of References Cited, PTO-892☐ Information Disclosure Statement(s), PTO-1449, Paper No(s).	
☐ Interview Summary, PTO-413	
☐ Notice of Draftsperson's Patent Drawing Review, PTO-948	
☐ Notice of Informal Patent Application, PTO-152	
SEE OFFICE ACTION ON THE FOLLOWING PAGES	

Art Unit: 2831

DETAILED ACTION

Election/Restriction

- 1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-12, & 17, drawn to a capacitor, classified in class 361, subclass 306.3.
 - II. Claims 13-16, & 18-23, drawn to a system (electric), classified in class 361, subclass 782.
 - III. Claims 24-29, drawn to a method of forming an electronic component, classified in class 156, subclass 89.12.
- 2. The inventions are distinct, each from the other because of the following reasons:

 Inventions II and I are related as combination and subcombination. Inventions in this

 relationship are distinct if it can be shown that (1) the combination as claimed does not require

 the particulars of the subcombination as claimed for patentability, and (2) that the

 subcombination has utility by itself or in other combinations (MEP. § 806.05(c)). In the instant

 case, the combination as claimed does not require the particulars of the subcombination as

 claimed because the capacitor does not require a plurality of vias, a controlled collapse chip

 connection, a plurality of pads and a plurality of first and second electrode layers interlaced with

 each other. The subcombination has separate utility such as capacitor used in an electronic

 system without a die, and the plurality of conductive layers embedded in the dielectric (wherein

 the vias connect thereto) can form a resistive element.

Application/Control Number: 09/473,315 Page 3

Art Unit: 2831

- 3. Inventions III and I are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MEP. § 806.05(f)). In the instant case the process as claimed does not have to form a capacitor (it can form resistive elements -- other than passive components within a stack).
- 4. Inventions III and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MEP. § 806.05(f)). In the instant case the process as claimed does not have to form a capacitor (it can form resistive elements -- other passive components within a ceramic stack).
- 5. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
- 6. A telephone call was made to Mr. Danny Padys on 1/11/01 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CAR 1.143).

Art Unit: 2831

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Eric Thomas whose telephone number is (703) 305-0878.
